Project

- Topic of general interest to the course.
- The idea is to read three or four papers from the literature (references will be provided)
- Implement the application on the cluster you build
- Synthesize them in terms of a report (~10-15 pages)
- Present your report to class (~20 mins)
- New ideas and extensions are welcome, as well as implementation prototype if needed.
- Send me email with your project idea and get approval before starting.
