[Origin’s of Maxwell’s demon]. In Knott [Kno11], pages 213–216. URL https://archive.org/stream/lifescientificwo00knotuoft#page/213. From the text: “When Tait was preparing his *Thermodynamics* for the press he asked Maxwell for some hints. Maxwell’s reply of date Dec. 11, 1867, was very characteristics and of great interest as begin probably the first occasion on which he put in writing his conception of those fine intelligences — Maxwell’s demons as Kelvin nicknamed them — who operating on the individual molecules of a gas could render nugatory the second law of thermodynamics.” That is followed by three more pages of the Tait–Maxwell correspondence on the matter of demons.
