[Gas54] R. Gáspár. Über eine Approximation des Hartree–Fock’schen Potentials Durch eine Universelle Potentialfunktion. (German) [On an approximation of the Hartree–Fock potential by a universal potential function]. *Acta physica Academiae Scientiarum Hungaricae*, 3(3–4):263–286, April 1954. CODEN APAHAQ. ISSN 0001-6705. URL http://www.springerlink.com/content/w24337x7040846x5/. In this paper, the Hartree–Fock–Slater X-α equations [Sla51e, Sla72d] are rederived by an independent method, with the prediction of a value \( \alpha = 2/3 \), instead of Slater’s original \( \alpha = 1 \). The same factor was later rediscovered in independent work [KS65].

The authors of this paper rediscover an earlier result [Gás54], and obtain the same value $\alpha = 2/3$, compared to Slater’s original $\alpha = 1$ [Sla51e, Sla72d].
