References

Rouvray:1987:EFa

[1] Dennis H. Rouvray. Editorial foreword. *Journal of Mathematical Chemistry*, 1(1):iii–iv, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/accesspage/article/10.1007/BF01205333; http://link.springer.com/article/10.1007/BF01205333.

Anonymous:1987:LW

[2] Anonymous. Letters of welcome. *Journal of Mathematical Chemistry*, 1(1):v–vii, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/accesspage/article/10.1007/BF01205334; http://link.springer.com/article/10.1007/BF01205334.

Sumners:1987:KTM

[3] D. W. Sumners. The knot theory of molecules. *Journal of Mathematical Chemistry*, 1(1):1–14, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01205335.

King:1987:CATa

[4] R. B. King. Chemical applications of topology and group theory. XXI: Chirality in transitive skeletons and qualitative completeness [1]. *Journal of Mathematical Chemistry*, 1(1):15–44, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01205336.

King:1987:CATb

[5] R. B. King. Chemical applications of topology and group theory. XXII: Lowest degree chirality polynomials for regular polyhedra [1]. *Journal of Mathematical Chemistry*, 1(1):45–59, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01205337.

Filip:1987:NAD

[6] P. A. Filip, T.-S. Balaban, and A. T. Balaban. A new approach for devising local graph invariants: Derived topological indices with low degeneracy and good correlation ability. *Journal of Mathematical Chemistry*, 1(1):61–83, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205338`.

Otto:1987:CRE

[7] P. Otto, J. Ladik, and P. G. Mezey. A convexity relation for the energies of certain polymers of unit cells of different sizes. *Journal of Mathematical Chemistry*, 1(1):85–96, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205339`.

Randic:1987:ECP

[8] Milan Randić. On the evaluation of the characteristic polynomial via symmetric function theory. *Journal of Mathematical Chemistry*, 1(1):145–152, March 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205340`.

El-Basil:1987:ACT

[9] Sherif El-Basil. Applications of caterpillar trees in chemistry and physics. *Journal of Mathematical Chemistry*, 1(2):153–174, July 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205666`.

Kirby:1987:FCG

[10] E. C. Kirby. The factorisation of chemical graphs and their polynomials: A systematic study of certain trees. *Journal of Mathematical Chemistry*, 1(2):175–218, July 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205667`.

Schneider:1987:QAM

[11] K. R. Schneider, B. Wegner, and J. Tóth. Qualitative analysis of a model for synaptic slow waves. *Journal of Mathematical Chemistry*, 1(2):219–234, July 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205668`.

Edward:1987:MAB

[12] R. Birnbaum Edward and A. Walker Elbert. A mathematical analysis of the Bjerrum function for the stepwise equilibrium model. *Journal of Mathematical Chemistry*, 1(2):235–247, July 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01205669.

King:1987:DTC

[13] R. Bruce King. The dimensionality and topology of chemical bonding manifolds in metal clusters and related compounds. *Journal of Mathematical Chemistry*, 1(3):249–265, September 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01179793.

Fernandez:1987:CPP

[14] Francisco M. Fernández, Gustavo A. Arteca, and Eduardo A. Castro. Critical parameters from power series expansions. *Journal of Mathematical Chemistry*, 1(3):267–280, September 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01179794.

El-Basil:1987:GLP

[15] S. El-Basil and M. Randić. On global and local properties of Clar pi-electron sextets. *Journal of Mathematical Chemistry*, 1(3):281–307, September 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01179795.

Klein:1987:RRN

[16] D. J. Klein, T. P. Zivković, and N. Trinajstić. Resonance in random π-network polymers. *Journal of Mathematical Chemistry*, 1(3):309–334, September 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01179796.

Rouvray:1987:EFb

[17] Dennis H. Rouvray. Editorial foreword. *Journal of Mathematical Chemistry*, 1(4):i, November 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/accesspage/article/10.1007/BF01205065; http://link.springer.com/article/10.1007/BF01205065.

OLeary:1987:WDH

[18] Brian O'Leary and R. B. Mallion. Walsh diagrams and the Hellmann–Feynman theorem: A tribute to the late Professor Charles A. Coulson, F.R.S. (1910–1974). *Journal of Mathematical Chemistry*, 1(4): 335–344, November 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205066`.

Bonchev:1987:CIL

[19] D. Bonchev, D. Kamenski, and O. N. Temkin. Complexity index for the linear mechanisms of chemical reactions. *Journal of Mathematical Chemistry*, 1(4):345–388, November 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205067`.

Scholberg:1987:EBP

[20] Harold M. Scholberg. An examination of the basic postulates of surface chemistry: A variational calculus analysis of the classic rotating drop experiment. *Journal of Mathematical Chemistry*, 1(4):389–403, November 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205068`.

Berman:1987:HPC

[21] D. M. Berman and K. W. Holladay. Homomorphism polynomials of chemical graphs. *Journal of Mathematical Chemistry*, 1(4):405–414, November 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205069`.

King:1987:CATc

[22] R. Bruce King. Chemical applications of topology and group theory. XXIV: Chiralization of chemically significant polyhedra [1]. *Journal of Mathematical Chemistry*, 1(4):415–421, November 1987. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01205070`.

Rouvray:1988:EFa

[23] Dennis H. Rouvray. Editorial foreword. *Journal of Mathematical Chemistry*, 2(1):vii, February 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/accesspage/article/10.1007/BF01166465`; `http://link.springer.com/article/10.1007/BF01166465`.

El-Basil:1988:TCA

[24] S. El-Basil. Theory and computational applications of Fibonacci graphs. *Journal of Mathematical Chemistry*, 2(1):1–29, February 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166466.

Bangov:1988:CAS

[25] I. P. Bangov and K. D. Kanev. Computer-assisted structure generation from a gross formula: II. Multiple bond unsaturated and cyclic compounds. Employment of fragments. *Journal of Mathematical Chemistry*, 2(1):31–48, February 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166467.

Mcquistan:1988:SOM

[26] R. B. Mcquistan and J. L. Hock. The shift operator matrix method applied to the two-dimensional nearest and next nearest neighbor problem. *Journal of Mathematical Chemistry*, 2(1):49–68, February 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166468.

Balasubramanian:1988:TPL

[27] K. Balasubramanian. Tree pruning and lattice statistics on Bethe lattices. *Journal of Mathematical Chemistry*, 2(1):69–82, February 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166469.

Kirby:1988:NSC

[28] E. C. Kirby. A note on some coefficients of the Chebyshev polynomial form of the characteristic polynomial. *Journal of Mathematical Chemistry*, 2(1):83–87, February 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166470.

King:1988:CP

[29] R. Bruce King. Chirality polynomials. *Journal of Mathematical Chemistry*, 2(2):89–115, April 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01165923.

Sinanoglu:1988:NPSa

[30] Oktay Sinanoglu. The new pictorial structural covariance method for qualitative quantum chemistry. II: Arenes with or without polyene side

chains and polyene bridges. *Journal of Mathematical Chemistry*, 2(2): 117–136, April 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01165924.

Sinanoglu:1988:NPSb

[31] Oktay Sinanoglu. The new pictorial structural covariance method for qualitative quantum chemistry. III: Fused polycyclics and their ions. *Journal of Mathematical Chemistry*, 2(2):137–154, April 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01165925.

Herndon:1988:LNB

[32] W. C. Herndon and A. J. Bruce. Linear notation for benzenoid aromatic hydrocarbons. Molecular similarity based on notation similarity. *Journal of Mathematical Chemistry*, 2(2):155–169, April 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01165926.

Mikulecky:1988:RRS

[33] D. C. Mikulecky and F. Sauer. The role of the reference state in nonlinear kinetic models: Network thermodynamics leads to a linear and reciprocal coordinate system far from equilibrium. *Journal of Mathematical Chemistry*, 2(2):171–196, April 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01165927.

Trinajstic:1988:CPC

[34] Nenad Trinajstić. The characteristic polynomial of a chemical graph. *Journal of Mathematical Chemistry*, 2(3):197–215, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167201.

Villaveces:1988:APE

[35] J. L. C. Villaveces, C. G. A. Arteca, F. M. Fernández, and E. A. Castro. Approximate polynomial expressions for Rydberg–Klein–Rees curves of diatomic covalent molecules. *Journal of Mathematical Chemistry*, 2(3):217–226, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167202.

Arteca:1988:NMC

[36] Gustavo A. Arteca, Francisco M. Fernández, and Eduardo A. Castro. New method for confluent singularity analysis of power series. *Jour-*

nal of Mathematical Chemistry, 2(3):227–239, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167203.

Battaglia:1988:PTT

[37] F. Battaglia and F. George. A Pascal type triangle for the number of topologically distinct many-electron Feynman graphs. *Journal of Mathematical Chemistry*, 2(3):241–247, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167204.

Randic:1988:IM

[38] M. Randić and B. Baker. Isospectral multitrees. *Journal of Mathematical Chemistry*, 2(3):249–265, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167205.

Mohar:1988:HCW

[39] Bojan Mohar and Tomaz Pisanski. How to compute the Wiener index of a graph. *Journal of Mathematical Chemistry*, 2(3):267–277, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167206.

Mukherjee:1988:ELE

[40] Asok K. Mukherjee. Eigenvalues of large even annulenes in terms of K_3, S_4 and S_5. *Journal of Mathematical Chemistry*, 2(3):279–286, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167207.

Bodroza:1988:NKS

[41] O. Bodroza, I. Gutman, S. J. Cyvin, and R. Tosić. Number of Kekulé structures of hexagon-shaped benzenoids. *Journal of Mathematical Chemistry*, 2(3):287–298, July 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01167208.

Rouvray:1988:EFb

[42] Dennis H. Rouvray. Editorial foreword. *Journal of Mathematical Chemistry*, 2(4):i, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/accesspage/article/10.1007/BF01166297; http://link.springer.com/article/10.1007/BF01166297.

Mezey:1988:SGS

[43] Paul G. Mezey. Shape group studies of molecular similarity: Shape groups and shape graphs of molecular contour surfaces. *Journal of Mathematical Chemistry*, 2(4):299–323, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01166298`.

Mezey:1988:GLR

[44] Paul G. Mezey. Global and local relative convexity and oriented relative convexity; application to molecular shapes in external fields. *Journal of Mathematical Chemistry*, 2(4):325–346, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01166299`.

Mekenyan:1988:TIM

[45] Ovanes Mekenyan, Danail Bonchev, and Alexandru Balaban. Topological indices for molecular fragments and new graph invariants. *Journal of Mathematical Chemistry*, 2(4):347–375, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01166300`.

Harary:1988:GSS

[46] Frank Harary and Pad G. Mezey. Graphical shapes: Seeing graphs of chemical curves and molecular surfaces. *Journal of Mathematical Chemistry*, 2(4):377–389, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01166301`.

Radhakrishnan:1988:MVA

[47] T. P. Radhakrishnan and W. C. Herndon. Molar volumes of alkanes and topological indices. *Journal of Mathematical Chemistry*, 2(4):391–399, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01166302`.

Turanyi:1988:MQS

[48] T. Turanyi, T. Berces, and J. Tóth. The method of quasi-stationary sensitivity analysis. *Journal of Mathematical Chemistry*, 2(4):401–409, October 1988. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL `http://link.springer.com/article/10.1007/BF01166303`.

Rouvray:1989:EFa

[49] Dennis H. Rouvray. Editorial foreword. *Journal of Mathematical Chemistry*, 3(1):vi, January 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/accesspage/article/10.1007/BF01171881; http://link.springer.com/article/10.1007/BF01171881.

El-Basil:1989:FNT

[50] Sherif El-Basil and Douglas J. Klein. Fibonacci numbers in the topological theory of benzenoid hydrocarbons and related graphs. *Journal of Mathematical Chemistry*, 3(1):1–23, January 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01171882.

Schuster:1989:GWC

[51] Stefan Schuster and Ronny Schuster. A generalization of Wegscheider's condition. Implications for properties of steady states and for quasi-steady-state approximation. *Journal of Mathematical Chemistry*, 3(1):25–42, January 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01171883.

Arteca:1989:SGT

[52] Gustavo A. Arteca and Paul G. Mezey. Shape group theory of van der Waals surfaces. *Journal of Mathematical Chemistry*, 3(1):43–71, January 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01171884.

Koca:1989:MMRa

[53] Jaroslav Koca. A mathematical model of realistic constitutional chemistry. A synthon approach. I: An algebraic model of a synthon. *Journal of Mathematical Chemistry*, 3(1):73–89, January 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01171885.

Koca:1989:MMRb

[54] Jaroslav Koca. A mathematical model of realistic constitutional chemistry. A synthon approach. II: The model and organic synthesis. *Journal of Mathematical Chemistry*, 3(1):91–115, January 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01171886.

Rouvray:1989:EFb

[55] Dennis H. Rouvray. Editorial foreword. *Journal of Mathematical Chemistry*, 3(2):i, April 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/accesspage/article/10.1007/BF01166044; http://link.springer.com/article/10.1007/BF01166044.

Johnson:1989:REM

[56] M. A. Johnson. A review and examination of the mathematical spaces underlying molecular similarity analysis. *Journal of Mathematical Chemistry*, 3(2):117–145, April 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166045.

Balasubramanian:1989:CPS

[57] K. Balasubramanian. Characteristic polynomials of spirographs. *Journal of Mathematical Chemistry*, 3(2):147–159, April 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166046.

Kvasnick:1989:TMG

[58] V. Kvasnička and A. J. Pospíchal. Two metrics for a graph-theoretical model of organic chemistry. *Journal of Mathematical Chemistry*, 3(2):161–191, April 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166047.

Poshusta:1989:EFT

[59] R. D. Poshusta and M. C. McHughes. Embedding frequencies of trees. *Journal of Mathematical Chemistry*, 3(2):193–215, April 1989. CODEN JMCHEG. ISSN 0259-9791 (print), 1572-8897 (electronic). URL http://link.springer.com/article/10.1007/BF01166048.
